Education

Full Stack Web Development (full-time)
Masai School, Bengaluru
October 2022 - September 2023

Bachelor of Computer Applications
Christ College, Pune
July 2018 - July 2021

Technical Skills

Java   JavaScript   Python

Spring Boot   Hibernate

Django   ReactJS

React Native   MySQL

RESTful APIs   Git

Prompt Engineer

Soft Skills

Effective Communication

Time Management   Adaptability

Teamwork

Certifications

Prompt Engineer

Abhijeet Hiwale

Java Backend Developer

Professional Summary

Dynamic Java Backend Developer with expertise in Spring Boot. Harnessing Generative AI to enhance development processes. Collaborative problem solver with strong communication skills, translating project requirements into efficient backend solutions. Committed to continuous learning, rapidly mastering new tech stacks, and optimizing code for performance and security.

Projects

RideEasy - Cab Booking Service   Live Demo Link   Github Repo Link

Java   Spring Boot   MySQL   Spring Security

- Developed a REST API for an online cab booking platform using Java and Spring Boot.
- Implemented user authentication and authorization using Spring Security for secure access to the booking service.
- Utilized MySQL database for storing user and trip information.
- Built the frontend using HTML, CSS, and JavaScript to provide a seamless booking experience.

Auctmatic - Online Auction   Live Demo Link   Github Repo Link

Java   MySQL

- Created an automated auction system using Java and MySQL.
- Implemented user authentication and registration functionality for buyers and sellers.
- Designed and managed the database schema for optimal performance and data integrity.
- Developed features such as product listing, purchasing, and detailed reporting for buyers, sellers, products, and sales.

AI Code Converter   Live Demo Link   Github Repo Link

Java   Spring Boot   ReactJS

- Spearheaded the development of "AI-Code-Converter," a solo project completed in just two days, incorporating cutting-edge Generative AI technology and newly acquired tech stack knowledge.
- Leveraged Java and Spring Boot to create a robust backend system for seamless code conversion from multiple programming languages.
- Engineered a user-friendly frontend interface using ReactJs, facilitating code debugging functionality and real-time code quality reviews with insightful suggestions.
- Implemented a Dark theme option for improved coding comfort, catering to user preferences and enhancing the overall user experience.
